## SUMMARY

Highly skilled Software Engineer with a proven track record of developing innovative web solutions. Expert in a modern full-stack environment, leveraging React, TypeScript, Node.js, and Tailwind CSS to build scalable, high-performance applications. Adept at driving projects from conception to deployment while ensuring robust code quality and exceptional user experiences.

## EXPERIENCE

### Software Engineer                                          Jan 2024 - Present
Azoomar LLC                                                    Douala, Cameroon

- Directed the IT department, overseeing comprehensive technological operations and strategic initiatives for a dynamic e-commerce marketplace.
- Engineered and deployed robust, full-stack features, significantly enhancing the large-scale Azoomar e-commerce platform.
- Established critical architectural and technological strategies, ensuring optimal platform scalability, security, and peak performance.
- Orchestrated the end-to-end software development lifecycle (SDLC), from conceptualization and planning through to deployment and post-launch maintenance.

## PORTFOLIO

### AI Resume Builder                              resume-builder-tan-two.vercel.app/

- A user-friendly tool to create professional resumes from various templates, with real-time preview and PDF export functionality.

### Astra Security Code Scanner                    security-code-scanner.vercel.app/

- An AI-powered security assistant that analyzes code snippets to identify and suggest fixes for common vulnerabilities, helping developers write more secure code.
